Toronto ON (Open to relocate)

Seeking a Full-Time role as an experienced Software Developer. A hardcore team-player and proven professional with expertise in distributed systems, cutting edge cloud.

PROFESSIONAL EXPERIENCE

Intuit Inc. Oct 2024 – Present
Software Engineer 2
Tech: Java 21, Kotlin, Springboot, Typescript, React

- Co-developed a Textract-based widget in TurboTax to ingest, parse, transform, and persist external documents via an event-driven pipeline allowing users to prefill all tax content; improved prefill rate from 91% to 97% for top 5 forms.
- Co-developed saved credentials pre import and payroll partner API integration to auto-retrieve tax forms and enable a done-for-you experience; adopted by 17% of eligible users and 9% of returning users.
- Solely built a Terraform-style framework in <1 week to automate Splunk alert; enabled build/change/version workflows, faster rollouts, and an improved audit and approval process for alert changes.

Amazon Inc. Jun 2022 – Oct 2024
Software Dev Engineer
Tech: Java 21, Springboot, JUnit5, Typescript, AWS CDK

- Service owner for a tier-1 application, enabling 40% faster onboarding, cutting user interventions, impacting $14 million in revenue for Amazon.
- Contributed to improving a deployment process using data pipelines, saving 4 SDE hours and 6 Analyst hours per deployment. Developed infrastructure using CDK to ensure connectivity with legacy systems.
- Executed a feature from design to implementation to support promoting Amazon devices to 20 million users.
- Implemented a proposal for making a tier-1 service resilient to outages that previously caused $200 million impact.
- Self-learner: Acclimatized myself with the service, tooling, and made design and code contributions within 30 days.

Mutual of Omaha Jan 2021 – Dec 2021
Cloud Engineer Co-op
Tech: Python3, Pytest, Typescript, Jenkins, AWS CDK

- Developed internal AWS CDK Constructs, enabling hardened & organization specific configurations for internal customers - making cloud infrastructure secure, consistent by default.
- Automated organization wide monitoring using AWS Config along with testing infrastructure.
- Formalized the new associate onboarding process, enabling colleagues to be productive in 90 days.
- Mentored an intern as a peer. Improved their understanding of the significance of their contributions by highlighting their achievements to the broader team.
- Partnered with product team as an SME for platform requirements, improving adoption of cloud resources and saving on dev time and infrastructure costs.
- Recognized as “Stellar” for performance and outcomes.

Tata Consultancy Services Jan 2017 – Aug 2019
Software Engineer
Tech: Java 8, Springboot, JUnit, IIB, Apigee, AWS, Azure

- Demonstrated a microservices based presales use-case for an enterprise using two IPaaS tools.
- Developed a cloud native web application to view data at-glance sourced from Hadoop for a logistics company.
- Developed a microservices system for securely exposing enterprise functionality for a digital banking app using RESTful APIs, impacting 20 million customers.
- Consistently achieved highest performance rating of 5/5.

ACADEMICS

Rochester Institute of Technology Aug 2019 – May 2022
Rochester NY, United States
Master of Science (MS) in **Computer Science**
Advanced Graduate Certificate in **Big Data Analytics**
Software Engineering, Computer Networks, System Design

University of Mumbai Jul 2012 – May 2016
Mumbai, India
Bachelor of Electrical Engineering (BS),
Operating Systems, Computer Networks, Microprocessor

TECHNICAL SKILLS

Core Skills: Java, JUnit, Python, Pytest, Typescript
DB: SQL, NoSQL, Postgres, MongoDB, DynamoDB
Other: Git, Agile, Microservices, Spring JPA, REST API, Flask, Pydantic, ElasticSearch, GraphQL, TDD
AWS: EC2, S3, IAM, RDS, DynamoDB, EMR, VPC, Glue, Lambda, Redshift, API Gateway, SWF, StepFunction, CDK
Tools: Docker, Kubernetes, JIRA, Mulesoft, IICS
